MERITS OF Lamipacker LPD 3210 Meister

- Four rollers system (2Hot Rollers and 2 Pulling Rollers) makes complete adhesion for photos as well as the documents and printed papers with excellent finish and it prevent curling of the film after lamination and gives further flatness to laminating finish.
- Both laminating temperature and speed are adjustable, making them possible to laminate almost all sorts of materials, from thin to thick including Photos &ID Cards.
- Easy operation and digital display of the setting temperature and speed.
 - Reverse (rotation) Switch can cope with troubles (jamming, etc.) which may happen.

LAMINATION FEATURES

- Scratches, tears and blemishes are prevented, preserving the laminated documents in a pristine condition for a long time.
 Lamination makes absolute waterproof and high resistant to chemicals and oils. Perfect sealing and complete adhesion prevent falsification and alteration of the laminated documents.
- Excellent transparency makes text and figures stand out sharply and clearly. Especially, lamination for color copying papers, ink jet printer papers and plotter machine papers is most effective, which makes the contents of these documents more glossy and brightly.
- The laminated surface, may be written on with oil-based ink, and the writing can be erased with alcohol and rewritten.
- For convinient filing in binders and such like, holes can be punched in laminated documents.

LAMINATABLE FILMS

Be sure to use FUJI exclusive lamination film, "CP LEAF." The standard thickness of "CP LEAF" are 80,100,125,150 and 250 microns. High quality finish is available in the lamination of full colored pictures such as photos, output by ink-jet printer. Please contact our dealer for the further infomation about films.

SPECIFICATIONS

Item Number	LPD 3210
Maximum Laminatable Width	340mm (A3W)
Maximum Laminatable Thickness	1.2mm including lamination film
Lamination Speed	0.4-1.0m/min.
Maximum Film Thickness	250micron
Temperature Control Range	70-160℃
Warm-up Time	Approx. 7min.
Heating Method	Hot Roller (External heating method)
Number of Rollers	4 Rollers (2 Hot Rollers + 2 Pull Rollers)
Reverse Switch	Equipped
Power Consumption	500W
Power Source	High voltage Area AC220-240V 50/60Hz
Dimensions	572 (W) × 240 (D) × 126 (H) mm
Net Weight	12.0Kg
Details of Individual package	655 (W)×320 (D)×215 (H) mm 13.3Kg

⚠ SAFETY PRECAUTIONS

- Be sure to read through the instruction manual carefully before operating the laminator.
- If irregularities occur during operation (e.g., power cords and plugs getting unusually hot, the emission of strange odors or smoke) or if extraneous materials get into the laminater, disconnect the machine and contact our dealer.
- Note that the warning seals have been removed from the machine shown in the photograph in this brochure.
- Specifications and appearance are subject to change without notification due to the introduction of improvements, etc.
- Spare parts are guaranteed to be kept in stock for 5 years after production of the machine is discontinued.

%The contents of this brochure are valid as of December, 2006.
